

GENESI M ordinary maintenance kit

Cod. TA-FL-024-K-SCC

Ordinary maintenance kit for GENESI compressors with dryer. The kit consists of the cartridges of the dryer filtration battery (2 cartridges: 5 + 0.01 micron) and the relative O-rings, the pumping element suction filter and the non-return valve pad. Annual replacement of kit components is recommended. Maintenance operations can be performed at a higher frequency if the environment in which the compressor works is particularly dirty.
